

Open Seeds by OLS

A mentoring & training program for Open Science ambassadors

M. Freeberg, F. Psomopoulos, D. Pilvar, B. Batut & the OLS Community

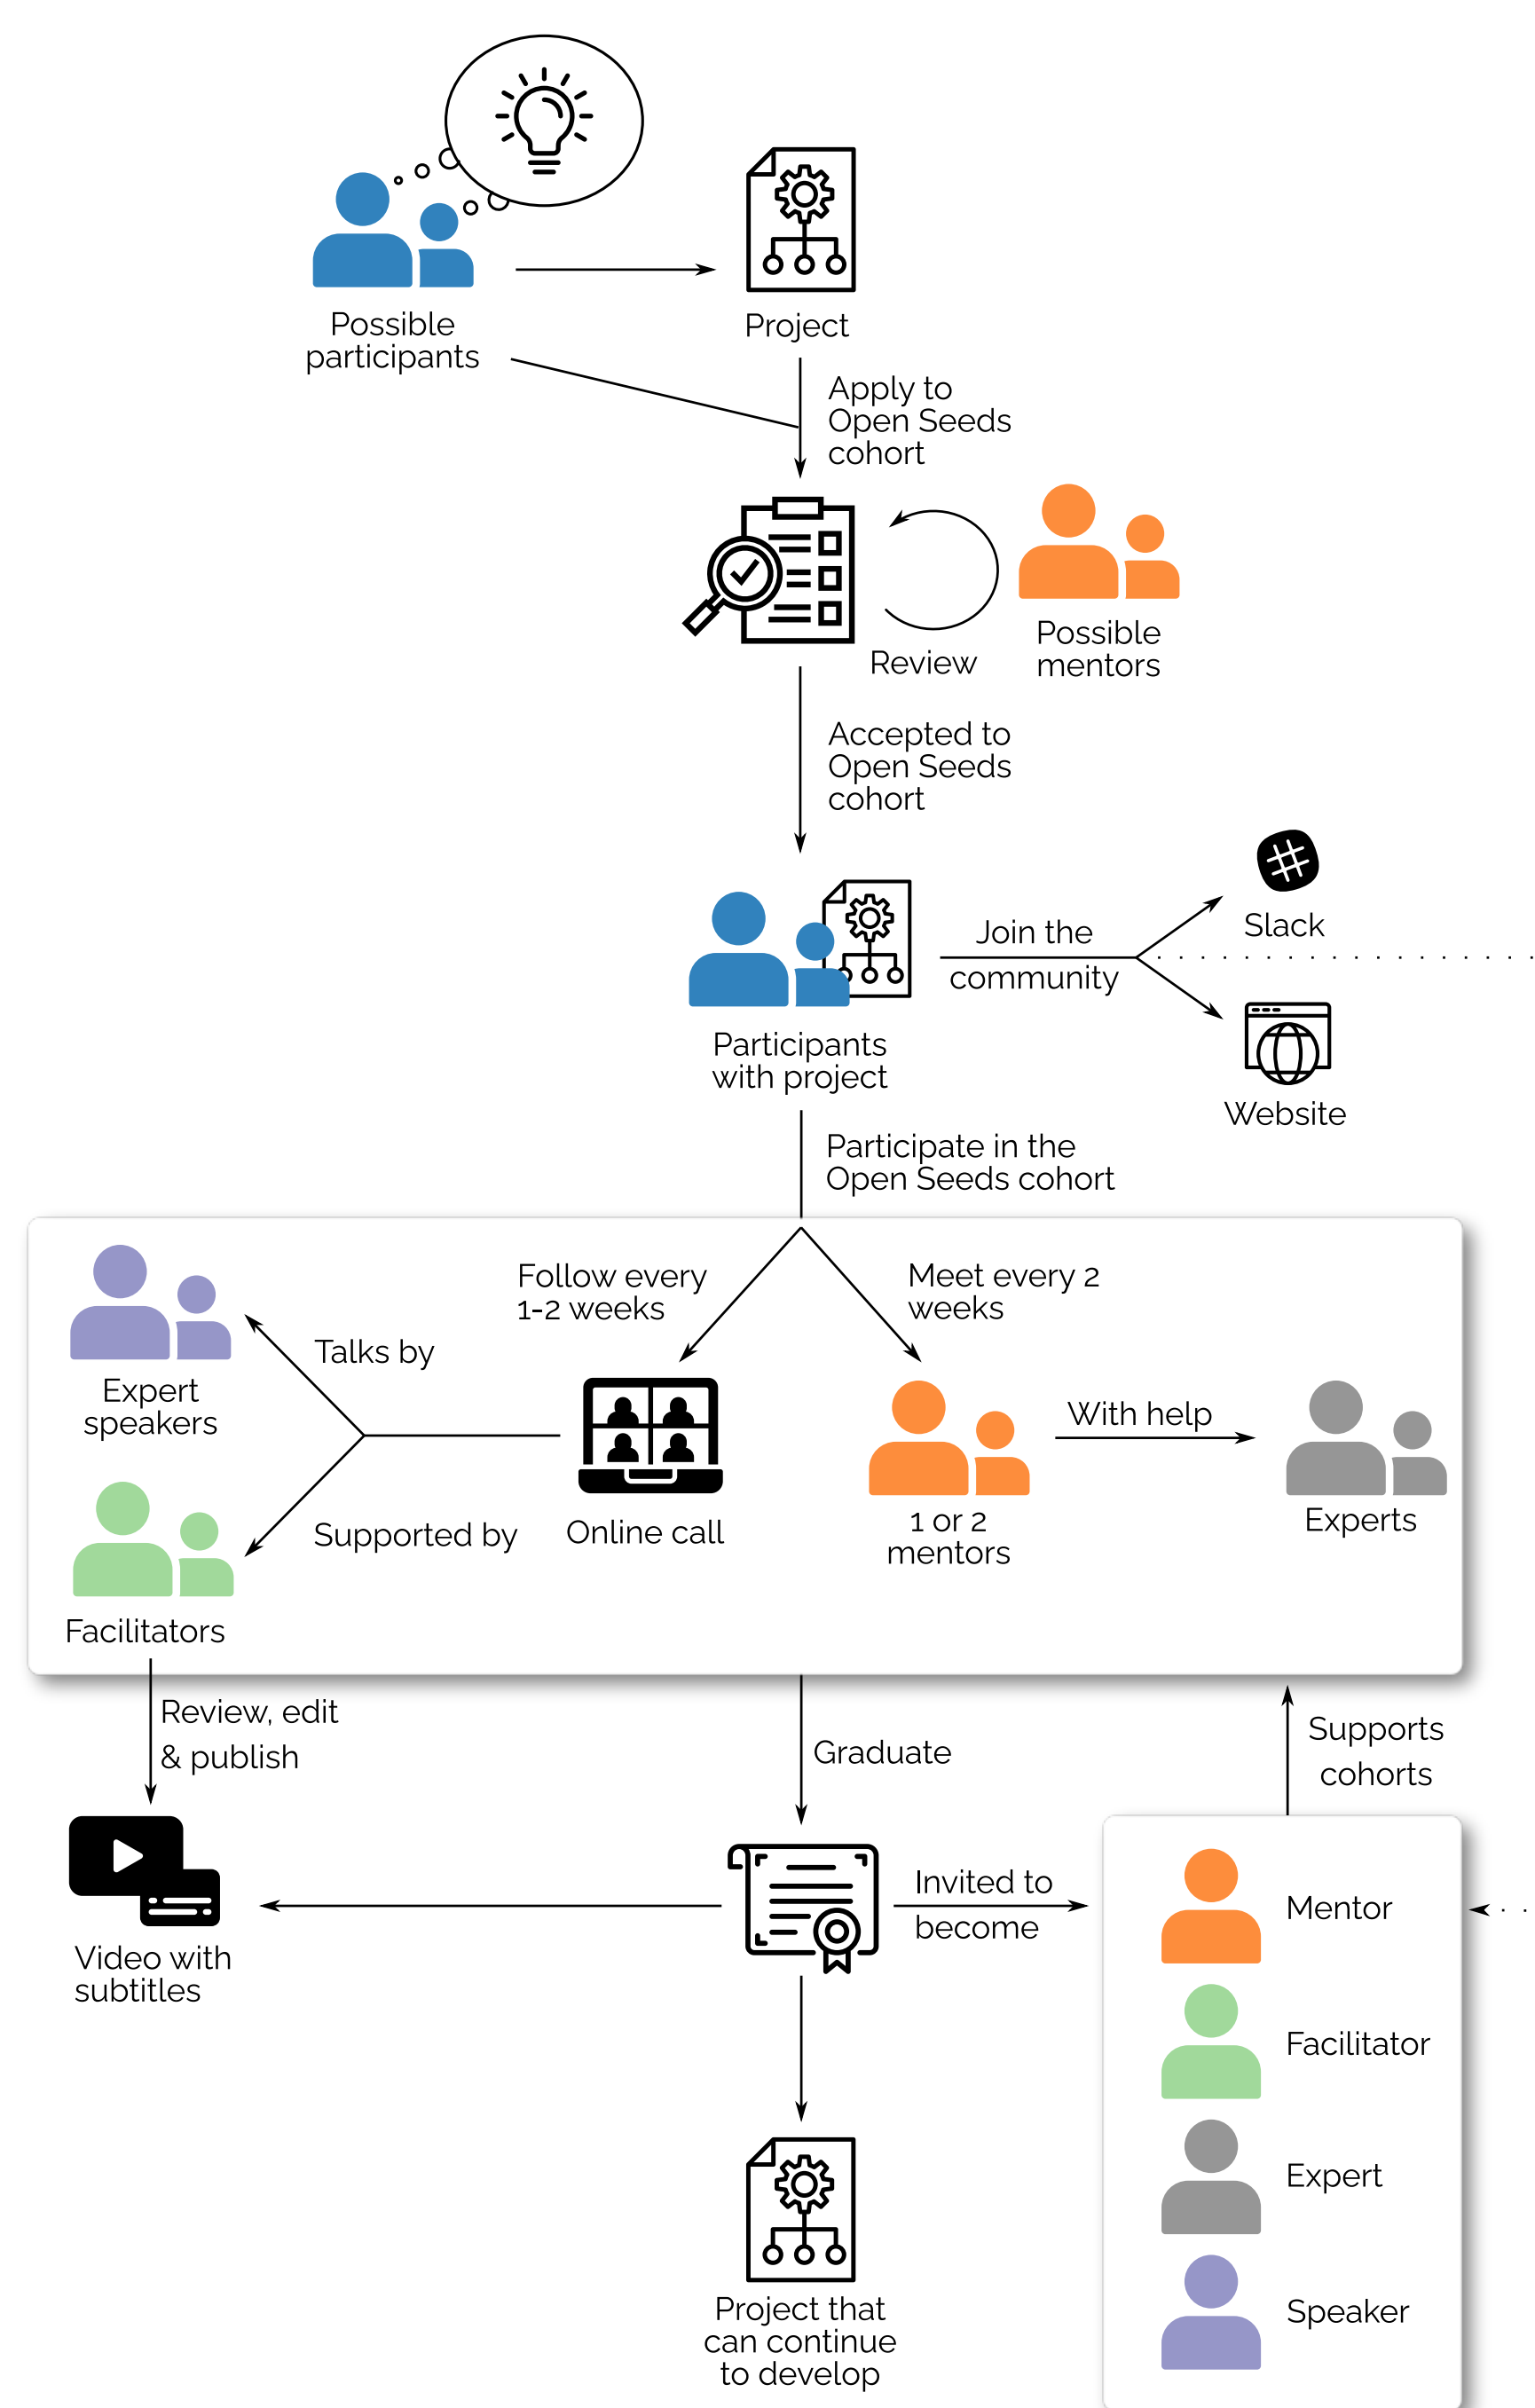

Contact: team@openlifesci.org

OLS offers Open Seeds, a **16-week training** and **mentoring** program to enable researchers and their teams to lead **open** research projects in their respective domains and become **open science ambassadors** for their communities.

Open Seeds **broadens** access to open science practices, methods and skills, and **empowers** researchers through opportunities for **capacity building** in three aspects:

- (1) offering a **structured and accountable platform** for highlighting, supporting, and rewarding **grassroots** open research projects,
- (2) promoting participation & **leadership** of members from communities historically underrepresented in open science,
- (3) expanding the scope of their project and scaling efforts through **collaboration with international projects**.

Program Structure

With the combination of **practical training** and **1:1 support** from our **mentors**, we guide participants to reflect on and apply open **practices** in the context of the socio-cultural environment where they conduct their research. Participants join the program with an **open science project**. They attend **cohort calls** to learn about open science practices and frameworks to apply hands-on open science skills including **FAIR** research principles and **equitable** and **inclusive community** practices. In mentoring calls every alternating week, they **reflect** on their progress and identify the next steps. To strengthen their skills, program graduates can **re-join** subsequent cohorts as mentors, call facilitators, and expert speakers. We offer **micro-grants**, **live transcription**, and other resources to make the program **inclusive** and **accessible**.

Since 2020

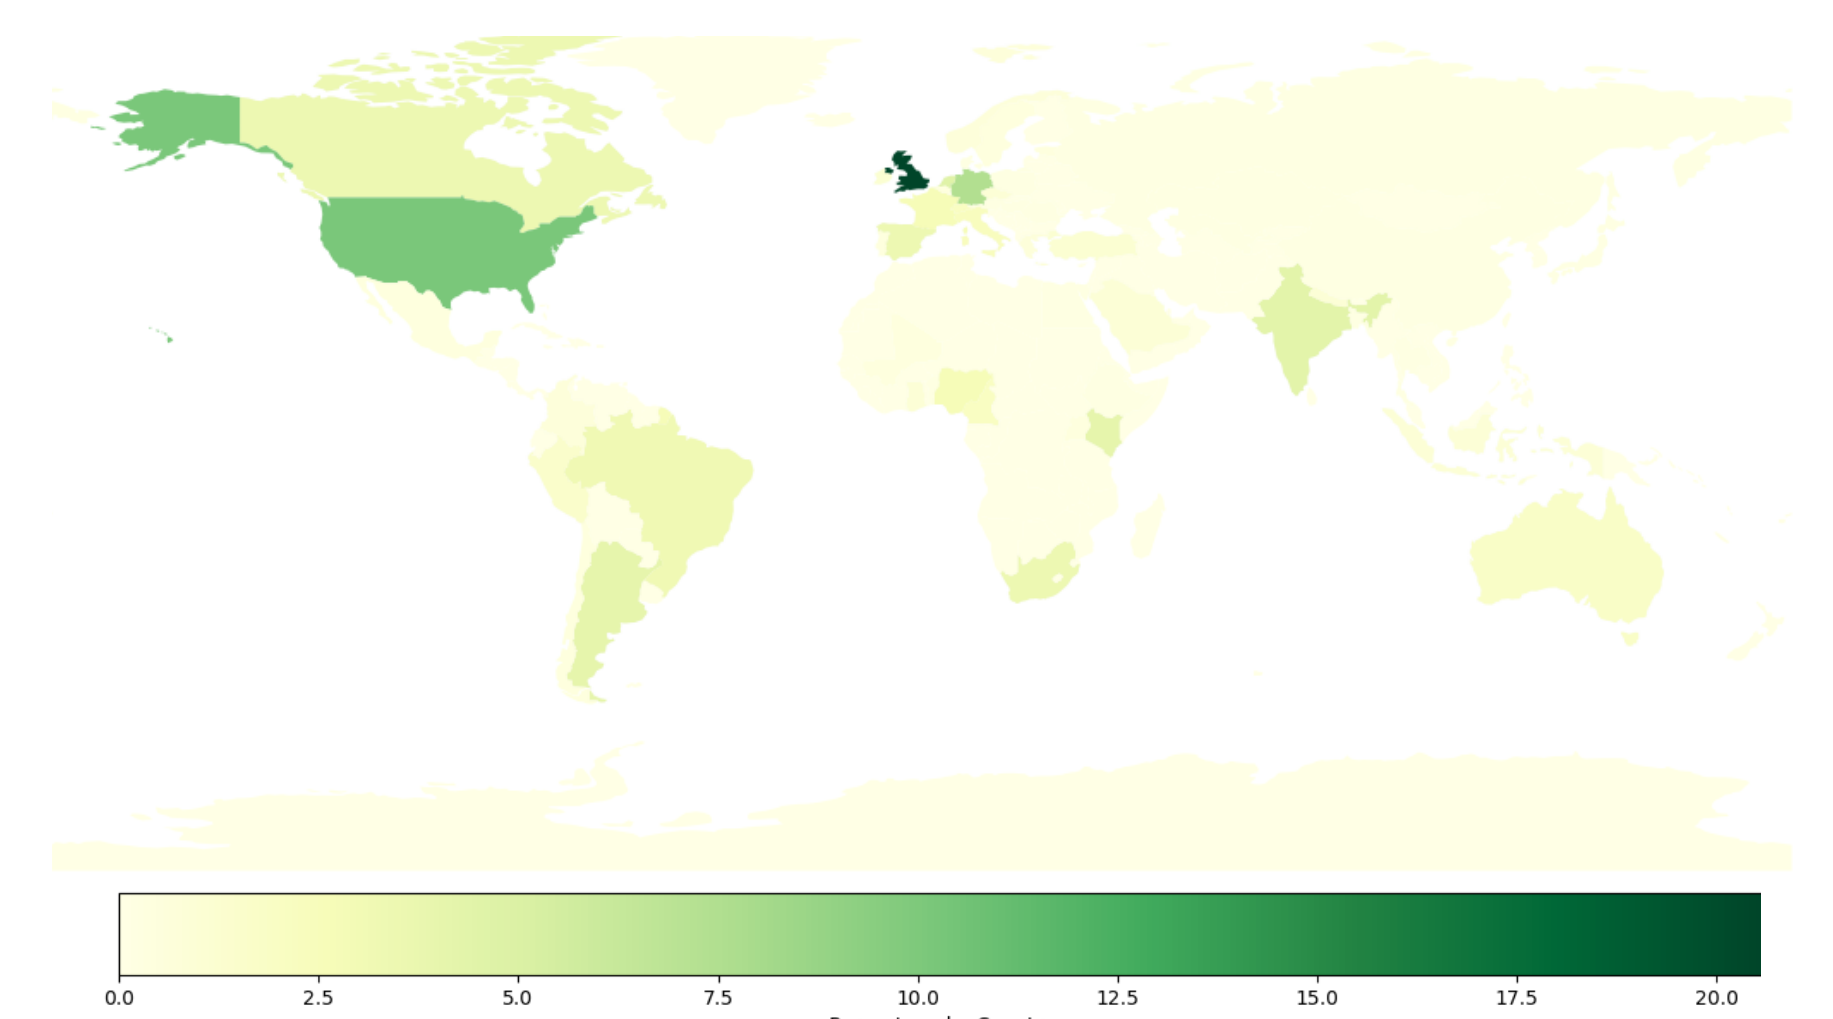

7
Cohorts

300+
Participants

120+
Mentors

150+
Experts

A worldwide community

A diversity of paths

Video library of Expert talks

From the talks in the cohort calls, we built a **FAIR** catalog of **captioned** videos.

80+
Speakers

200+
