Galaxy gigantic ecosystem

Galaxy's rapid expansion in tools, workflows, and resources has created a powerful but overwhelming ecosystem. To address accessibility, the CoDex was established to simplify navigation, serving as an automated system for communities to highlight their resources.

The CoDex, a solution to connect everything!

A catalog of Galaxy resources

A Community-Centric Solution for Accessibility

Source for the Community Labs

Centralised webpage for communities to aggregate, curate, integrate, display, and launch relevant tools, workflows, and training on different Galaxy servers

Available labs:
Microbiology, Single-cell, Biodiversity-genomics, Imaging, Earth-system, Proteomics
And Yours?

Future Directions

1. Continue developing the **Codex** and **Labs** based on feedback from the community and users.
Code reviews and code implementation needed!
Reach out to us.
2. Need for a glossary or visual figure to clarify terms (e.g., SIG, CoDex, Labs).

WE NEED HELP!

Acknowledgments
