Galaxy gigantic ecosystem

Galaxy's rapid expansion in tools, workflows, and resources has created a powerful but overwhelming ecosystem. To address accessibility, the CoDex was established to simplify navigation, serving as an automated system for communities to highlight their resources.

Galaxy Tool Shed

"Appstore" for Galaxy tools whose the sources are stored in various GitHub repositories, e.g. the repository maintained by Intergalactic Utilities Commission:

Dependencies are managed via

Metadata like EDAM are pulled from:

Galaxy IWC - Workflow Library

Open, peer-reviewed workflows for reproducible science, maintained by the Intergalactic Workflow Commission. Workflows (IWC ones and others) are available on:

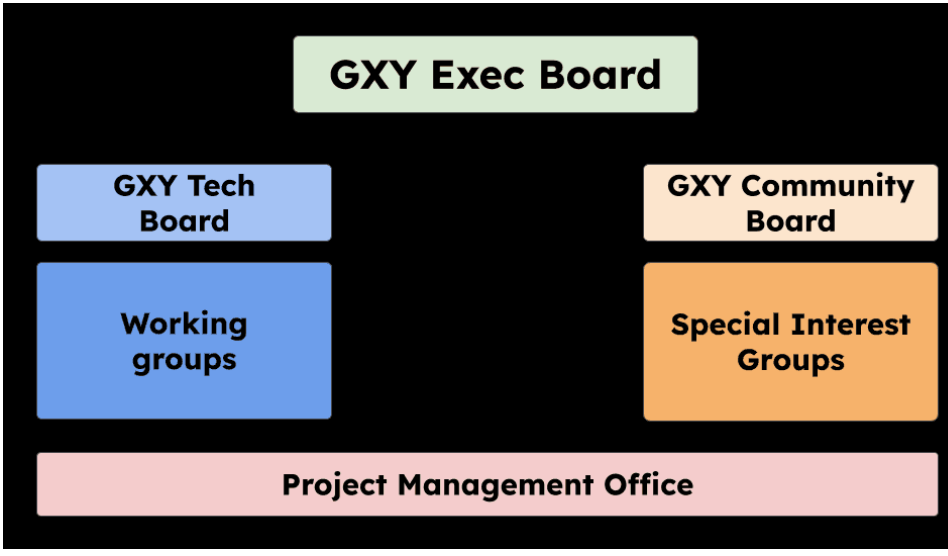

Dockstore

"Galaxy Flavours" / subdomains / landing pages with curated content for defined research domains

Galaxy Training!

Collection of tutorials and other training materials (slides, videos, etc.) developed and maintained by the Galaxy Training Network

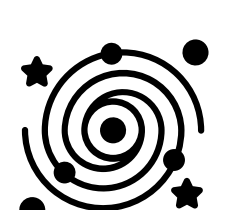

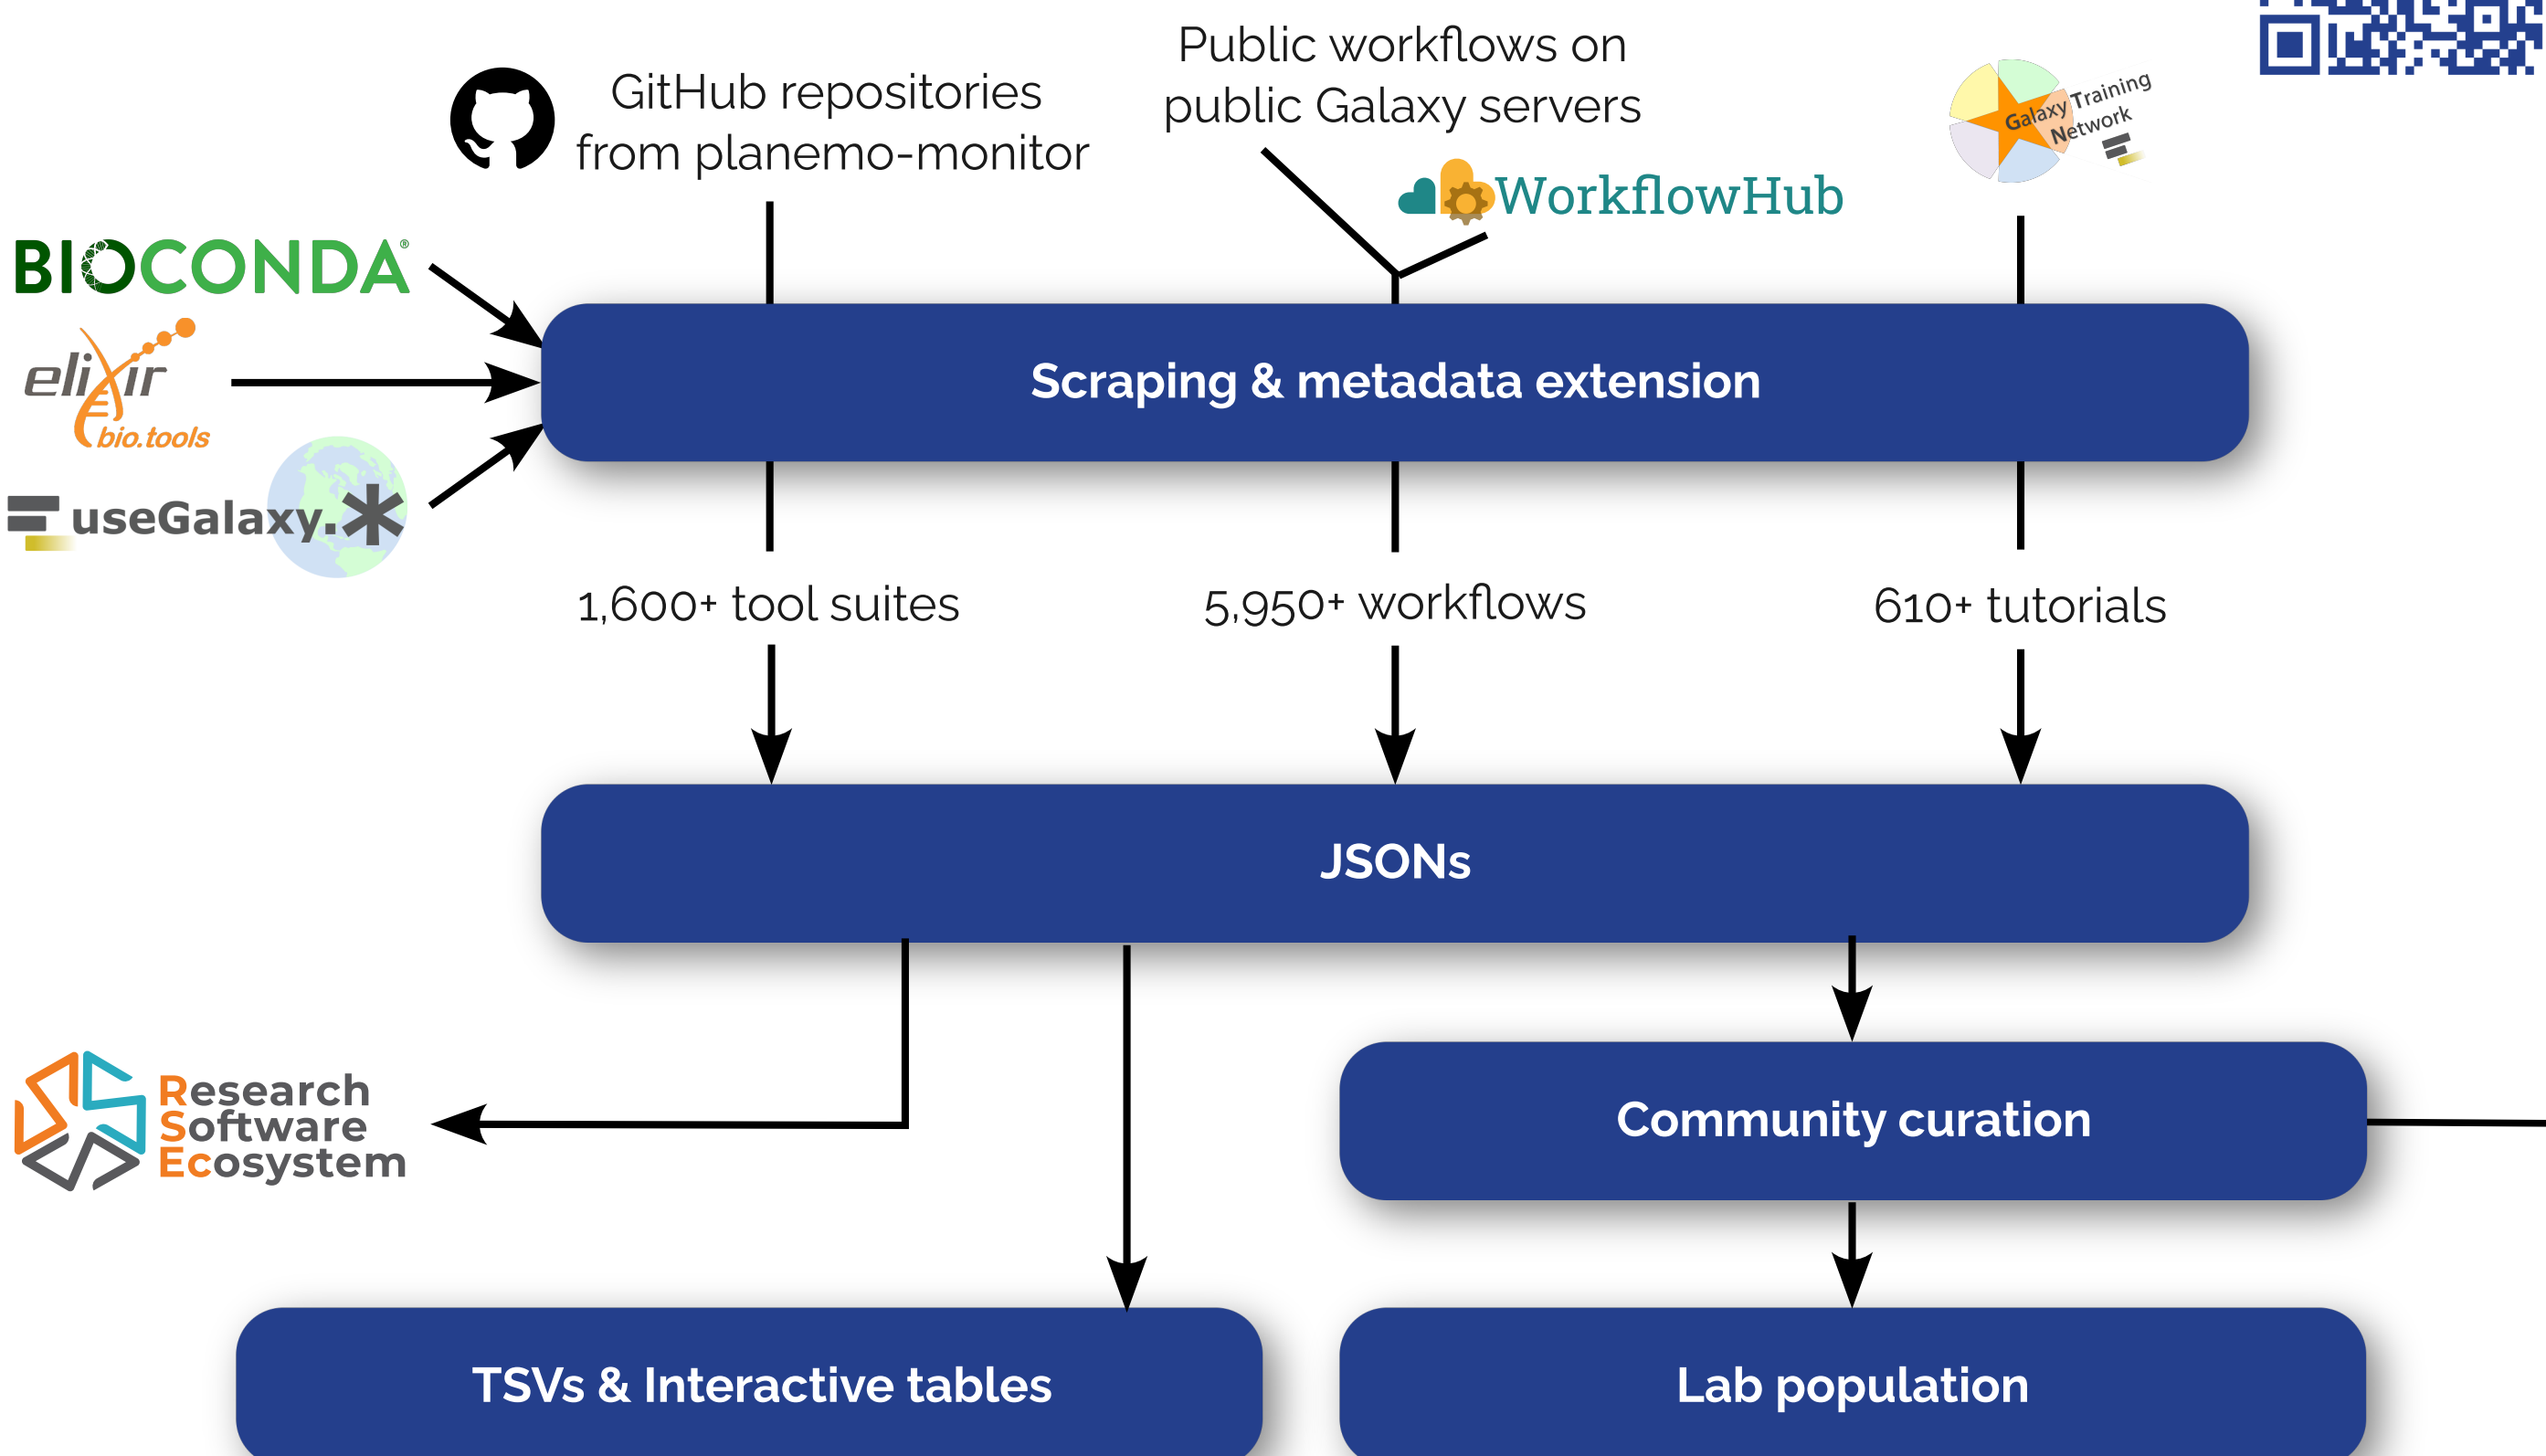

Special Interest Groups (SIG), active Galaxy communities with a focus on specific shared interests. They are supported by the Galaxy Community Board (GCB). The GCB represents SIGs in the Galaxy Governance:

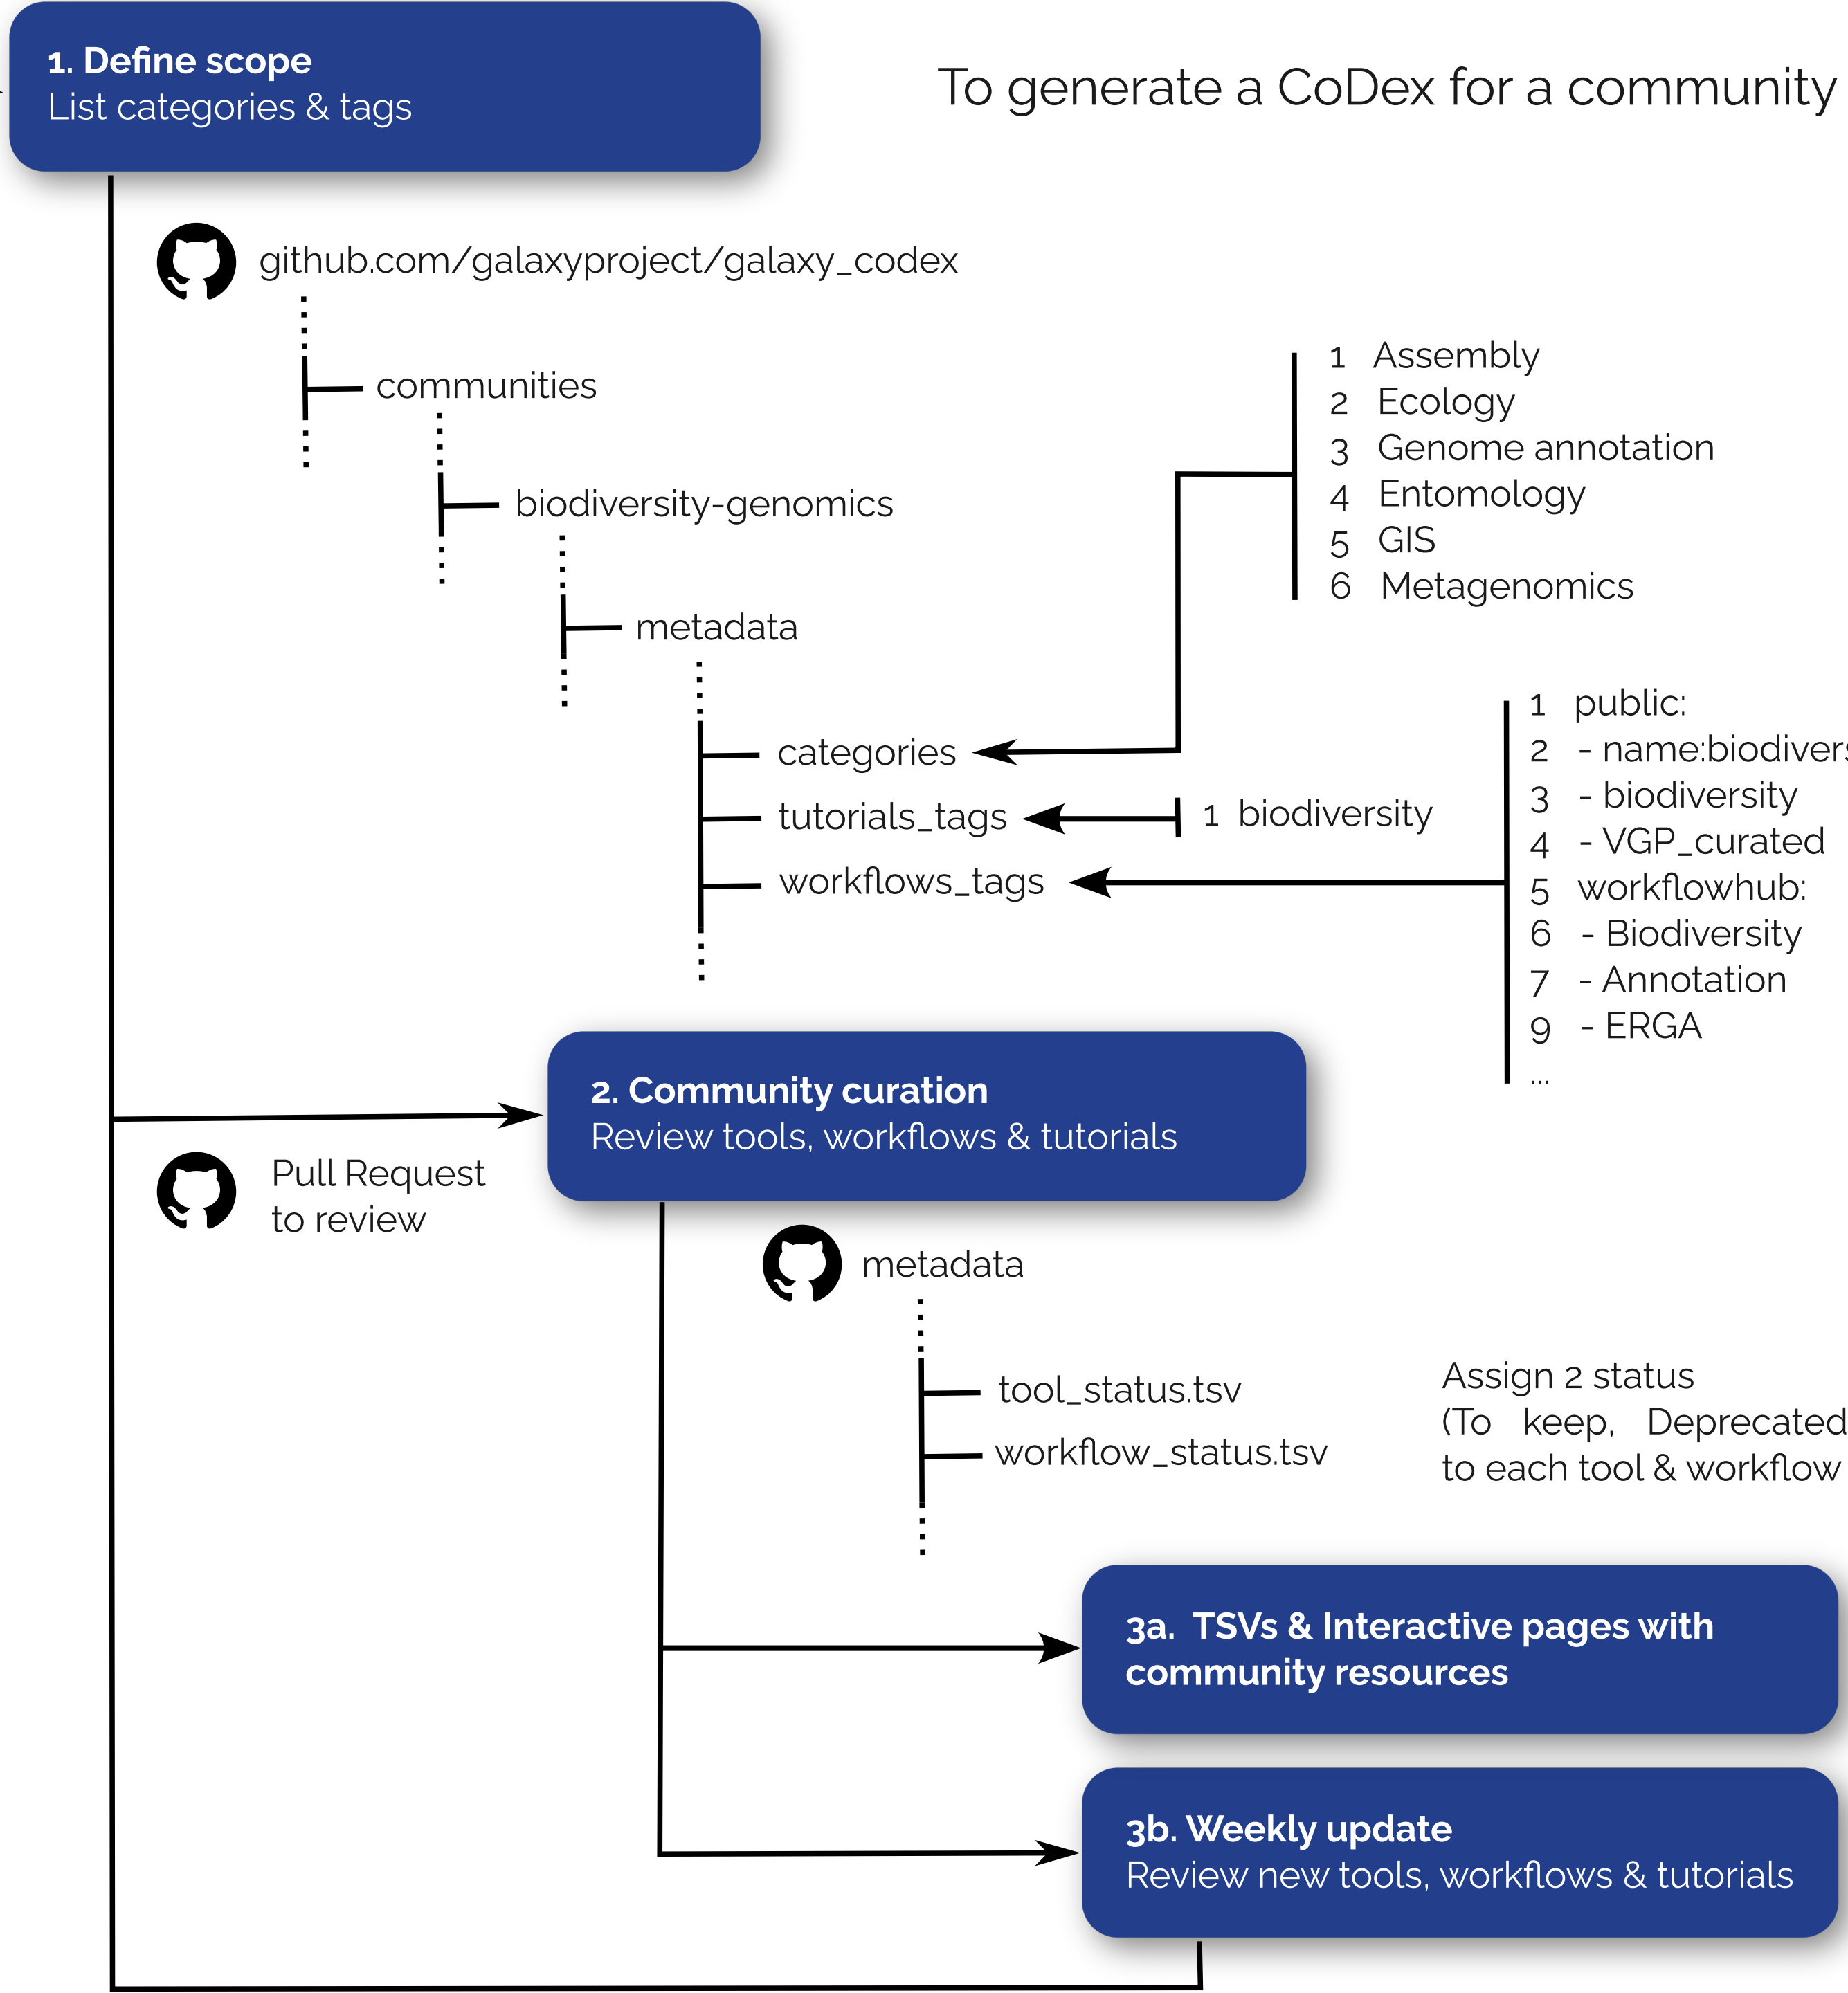

The CoDex, a solution to connect everything!

A catalog of Galaxy resources

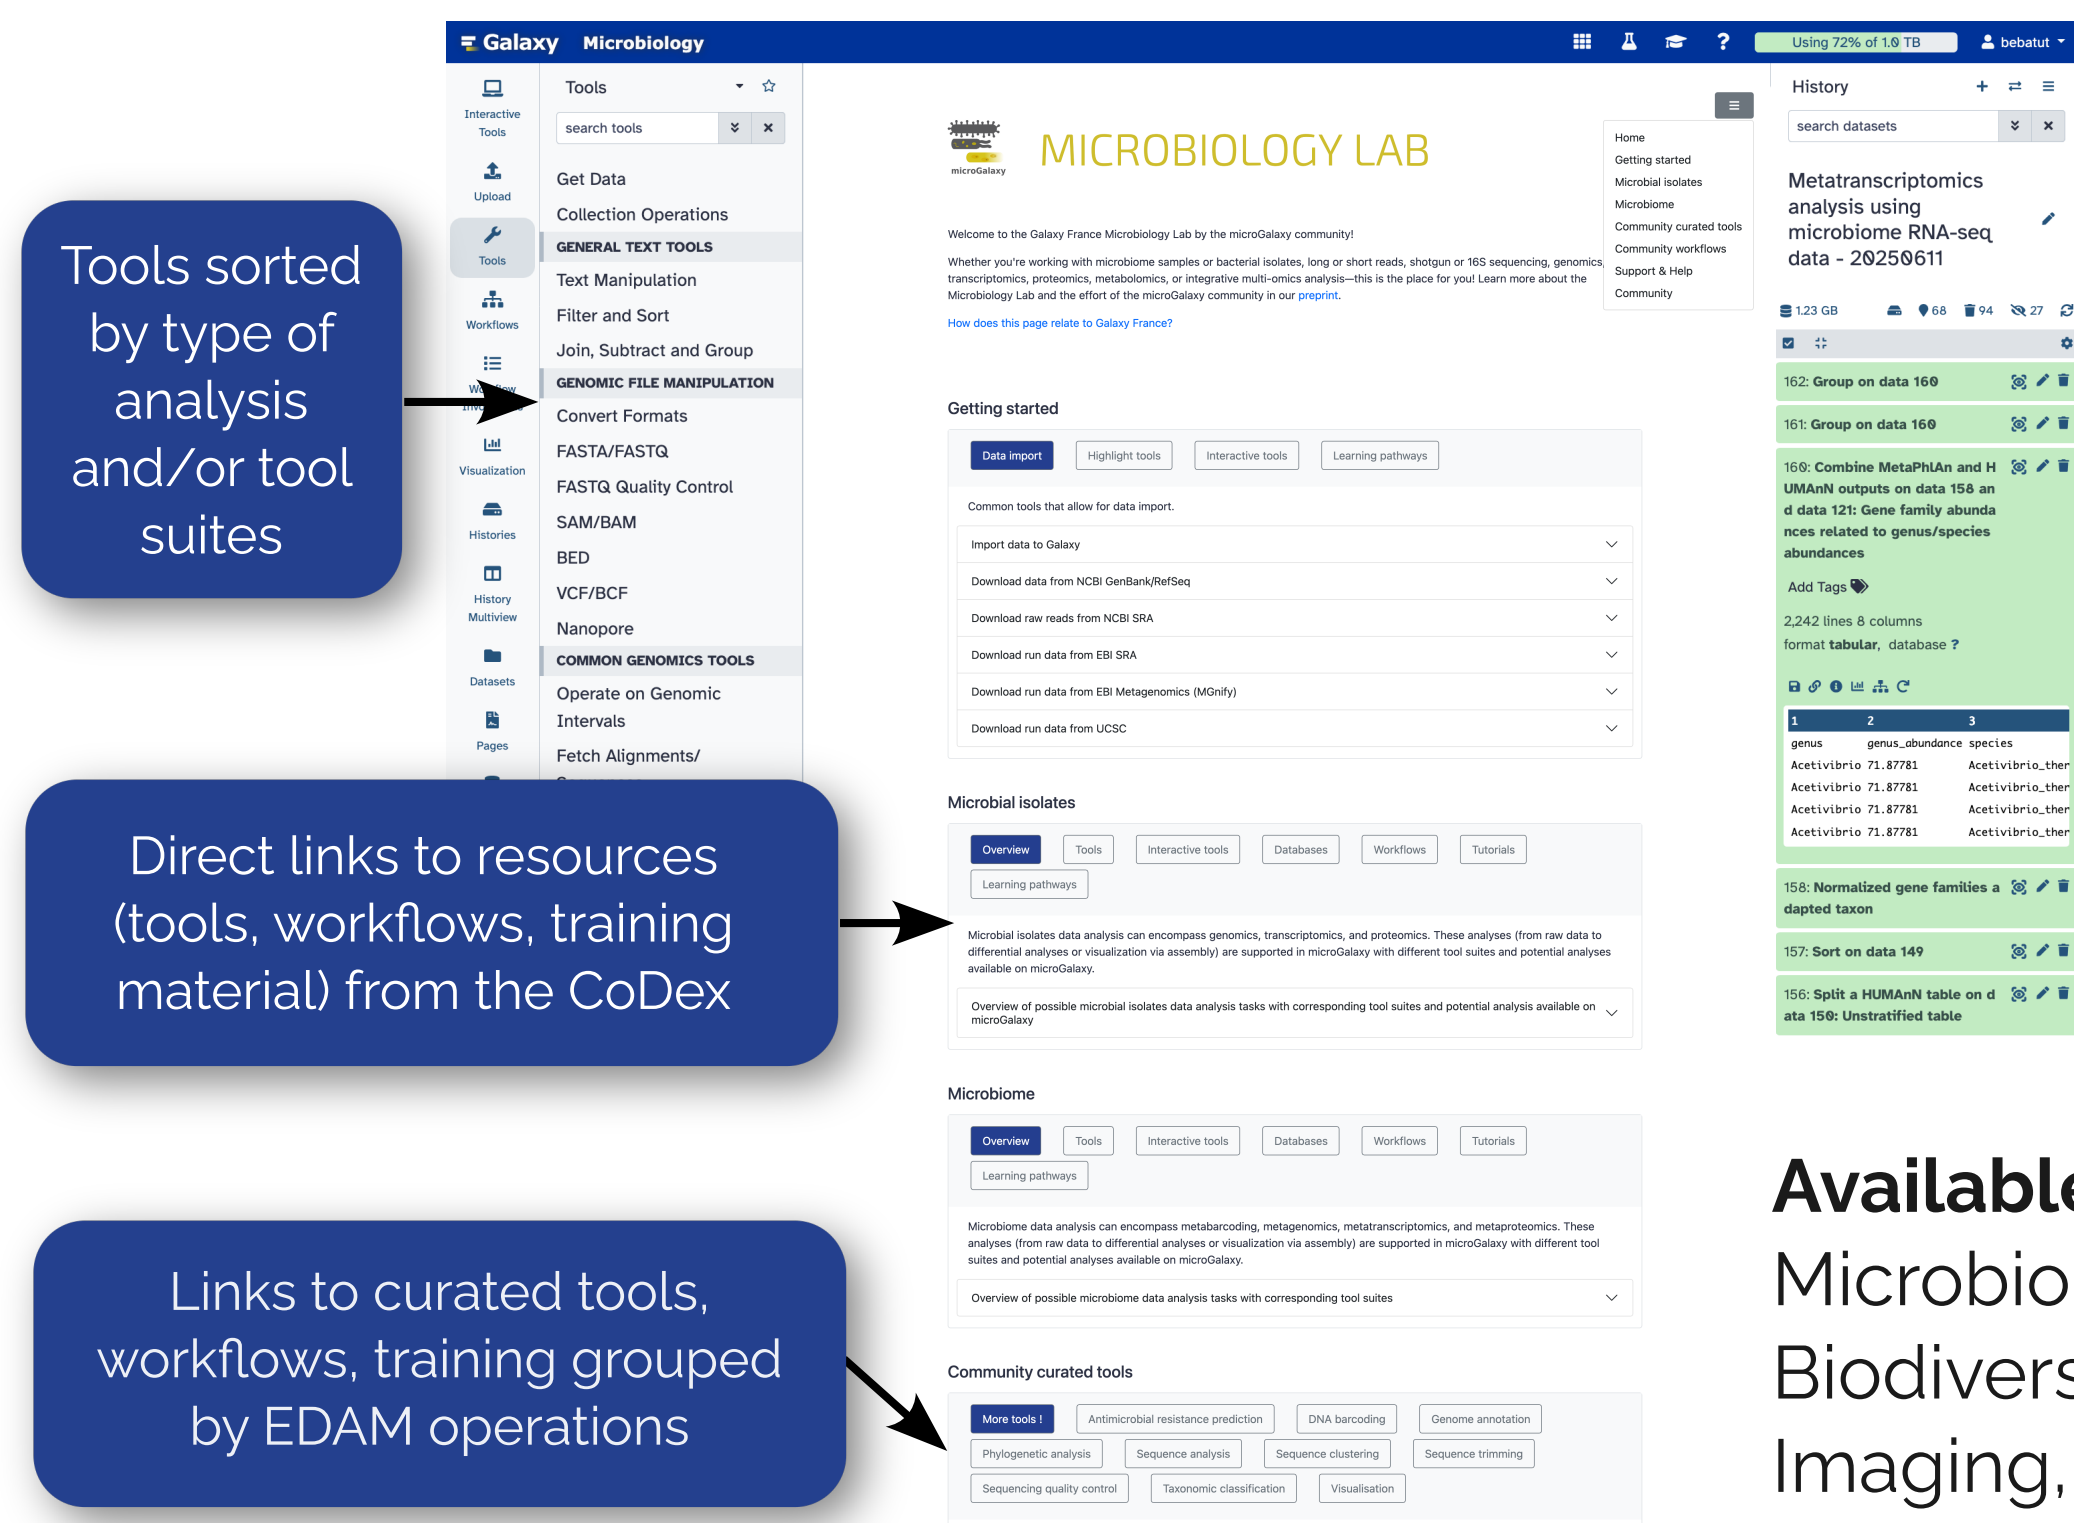

A Community-Centric Solution for Accessibility

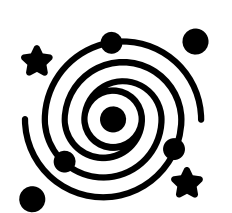

Source for the Community Labs

Centralised webpage for communities to aggregate, curate, integrate, display, and launch relevant tools, workflows, and training on different Galaxy servers

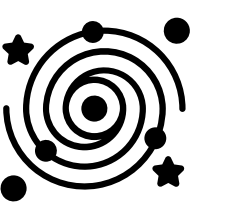

Available labs:
Microbiology, Single-cell,
Biodiversity-genomics,
Imaging, Earth-system,
Proteomics
And Yours?

Future Directions

1. Continue developing the **Codex** and **Labs** based on feedback from the community and users.
Code reviews and code implementation needed!
Reach out to us.
2. Need for a glossary or visual figure to clarify terms (e.g., SIG, CoDex, Labs).

WE NEED HELP!
