

Microbiology Galaxy Lab (MGL): The first community-driven gateway for reproducible and FAIR analysis of microbiological data analysis

Engy Nasr¹, Nikos Pechlivanis², Nikolaos Strepis³, microGalaxy Community, Paul Zierep¹ and **B  r  nice Batut**^{4,5}

¹Bioinformatics Group, Department of Computer Science, University of Freiburg, Georges-Koehler-Allee 106, D-79110 Freiburg, Germany, ²Institute of Applied Biosciences, Centre for Research and Technology Hellas, Thessaloniki, 57001, Thessaloniki, Greece, ³Department of Pathology and Clinical Bioinformatics, Erasmus MC Cancer Institute, Erasmus MC, Rotterdam, Netherlands, ⁴Laboratoire Microorganismes: G  nome et Environnement (LMGE), UMR CNRS 6023, Universit   Clermont Auvergne, F-63000 Clermont-Ferrand, France, ⁵IFB-core, Institut Fran  ais de Bioinformatique (IFB), CNRS, INSERM, INRAE, CEA, 94800 Villejuif, France

Microbial research increasingly relies on high-throughput and multi-omics approaches, generating complex datasets. However, identifying and navigating relevant tools and workflows within platforms like Galaxy remains challenging

How do scientists analyse microbial data?

Scientists study different organisms using different techniques and analyses, and want to use Galaxy

ResReplyOpenults of a survey conducted among the microbiology research community (March - September 2023, 130 responses)

Could scientists use Galaxy for microbial data analysis?

Resources for microbial analysis in Galaxy are highly used for a wide range of key computational functions

Availability

microbiology.usegalaxy.org, .eu, .org.au, .fr

Docker image

Contact

berenice.batut@uca.fr

Do scientists use Galaxy for publications?

28% of publications citing Galaxy are microbiology-related papers

How does MGL help scientists find the right resources for microbial data analysis?

MGL has:

- 884 microbiology related tools
- 117 workflows
- 39 tutorials

MGL is FAIR:

- Findable (e.g., WorkflowHub, Dockstore)
- Accessible (Galaxy servers: org, .eu, .org.au, .fr)
- Interoperable (EDAM)
- Reusable (e.g., versioned workflows)

MGL is sustainable:

- microGalaxy Community-driven ecosystem
- Roadmap 2026–2030

The Institut Fran  ais de Bioinformatique (IFB) is funded by France 2030, via the Agence Nationale de la Recherche grants ANR-11-INBS-0013(PIA1 RENABI-IFB), and ANR-21-ESRE-0048 (PIA3 ESR/Equipex+ MUDIS4LS).
